What is the Enneagram? It Is All of Us Together
Understanding personality type can help us navigate life with greater ease. The Enneagram is used worldwide as an effective tool in spirituality (higher states of being, essence, and enlightenment), psychology, and business (insights into workplace dynamics).

The Enneagram reveals that all people belong to one of nine major personality types. The purpose of the Enneagram is not to put you into a box, but to help you identify both the strengths and limitations of a preferred strategy. Learn more about these tools for self-discovery and self-development with special guest Dale Rhodes, founder of Enneagram Portland.

An Intergenerational Perspective
The Greatest Generation/Seniors, Baby Boomers, Generation X, and Millennials: how do we identify ourselves? What is our perception of one another? Do the questions we ask ourselves get bigger as we age? Ah, so many questions!
With guests from all age groups at this Salon, let’s reflect upon, and share who we are, and why we do what we do. An evening dedicated to new insights and positive reflection.

December 6 Trivia
Join us for Boomer Trivia Night at the Salon! A trip through memory lane - the events and people who influenced our generation and the contributions Boomers have made. Brush up on politics and activism, entertainment, the economy, gender roles, arts, pop culture, sports, religion, and the drug culture.

From the start of rock and roll to disco and beyond; from race riots to the election of a black president; from gender inequality to a woman presidential candidate... Boomers have seen it all! Let's take a little time to share how the culture has shaped each of our lives. Be prepared for a Boomer Trivia Contest!
